### Push-Fit the Josam Way

Josam's Push-Fit joint is accomplished by lubricating the joint and pushing the spigot and socket together. The result of this quick and easy joining method is a tight seal that has been tested and proven suitable for both gravity and vacuum applications. Additionaly, test results have demonstrated that the Josam Push-Fit joint is pressure rated at least 4 times higher than other stainless steel push-fit systems.

## Product and Size Range

Josam Company offers a complete range of pipes, fittings and hanging accessories. Pipe and fittings are available in 1-1/2", 2", 3", 4", 6" and 8" nominal pipe sizes. Pipes are available in 8 different lengths ranging from 0.8 feet to 9.8 feet, allowing for minimal field cuts. A complete range of stainless steel drains are also offered by Josam. For further details, please see Josam Company's Stainless Steel Drainage Product catalog

## Packaging

Each pipe length is individually wrapped in a protective plastic covering. Sizeable pipe shipments from Josam are crated for protection against damage during shipment. Small pipe shipments may be shipped in protective tubes.

## Markings

All Josam products are marked in accordance with applicable standards. Markings will include manufacturer's name and/or registered trademark, the grade of stainless steel, Josam name and part number and UPC®.

## Listings and Approvals

Products meet or exceed the performance requirements of ASME A112.3.1-2007 and IGC 275-10. Most Josam products are IAPMO listed under File #6780. Please refer to the IAPMO website or contact Josam Company for a copy of this listing or state and local code approvals. Additional approvals include Registro Italiano Navale, Lloyd's Register, American Bureau of Shipbuilding, Det Norske Veritas, Bureau Veritas and Russian Maritime Register of Shipping. All manufacturing and quality assurance is in accordance with the internationally recognized ISO 9001 standard

## Labor Savings

The Josam Push-Fit joining method allows joints to be made in a matter of seconds and does not require any tools. Connections are made by lubricating the spigot end and turning it into the socket end. Additionally, due to the fact that stainless steel is lighter in weight, the product is easier to handle and requires less manpower. Considering these two advantages with the life expectancy of the product, the Josam Push-Fit Stainless Steel System is an economical solution for most applications.
